

GENERAC®

The ideal option for complete home backup power is a home standby generator. A permanently installed Generac home backup generator protects the home automatically when grid power is interrupted. It runs on natural gas or liquid propane (LP) fuel, and sits outside like a central air conditioning unit. A home backup generator delivers power directly to your home's electrical system, backing up your entire home or Solar battery backup system.

Generac Guardian series HSB generators feature reliable Generac engines, designed and engineered in the U.S. And each is equipped with the remote monitoring capability of Mobile Link™, allowing owners to monitor the status of their generator on a phone, tablet or computer from anywhere in the world.

WE ARE THE ENERGY GENERATION!

info.au@pramac.com

In the power generation field, Pramac offers solutions for every kind of power supply demand: from lighting towers to dedicated customized solutions, from portable to industrial power supply, for standby and prime power applications. The Portable division meets the needs of both professional and occasional users, offering a wide product range. Quality, efficiency and high product standards are achieved through the use of modern design and manufacturing techniques, exceeding international regulations for noise and environmental pollution.

The Stationary division covers a wide range of generators up to 3360 kVA able to satisfy many requirements, regardless of the field of activity: industrial, medical, telecommunications, residential applications or rental. Available in open, container and soundproof versions, Pramac stationary generators serve the most demanding customer needs with a range of control panel solutions and many optional features and accessories. The Customized Solutions are a key business for Pramac, due to the specific applications and the increasing number of special projects exceeding the standard scope of supply special generators up to 4MVA with low, medium and high voltage output, to meet any customer requirement.

Power your life

Make power outages a thing of the past with a home standby generator.

LIGHTING TOWERS

V20 HYPER

- Height: 8.5m
